Evapco - Cooling Towers

We are cooling tower people! Evapco offers a variety of quality equipment including: cooling towers, ice thermal storage, adiabatic coolers, and dry coolers. In addition to equipment systems, Evapco offers in stock replacement parts and water treatments.

Lakos - Filtration Separators

Lakos filtration systems come in a variety of configurations including full stream, side stream, and different microns efficiency ratings. Filter performance is rated to remove 98% of solids 44 microns and larger in a single pass on the high efficiency models!

Kelvion - Dry Coolers, Plate and Frame Heat Exchangers

Kelvion has been in the business for over 100 years! Their drive for energy efficiency and smarter systems has given them a leading edge in the market. Their products most commonly offered by FIS are dry coolers, and plate and frame heat exchangers.

High-K - Heat Exchanger

Here at FIS, we manufacture our own shell and tube heat exchanger! The High-K is truly like no other with its custom applications and gasketed end. The gasketed end of this heat exchanger allows for the unit to be cleaned and inspected without downtime.

Franklin Control Systems - VFD

Franklon controls offers starters, drives, and VFD packages.

Franklin's cooling tower control pannels offer options such as:
basin heater control, vibration cut-out, water level control power,
spray pump starter, and energy saving modes.

Rovanco - Underground Pipping

Rovanco manufactures pre-Insulated and specialty piping. They have recently introduced the addition of Rhinoflex piping to their product line. Rovanco also offers large diameter PEX piping up to 16" that can come in the standard 20' and 40' lengths or in coils up to 2,500ft in length.

SMARDT- Air Cooled Chillers

Smardt oil-free centrifugal chillers offer one of the highest IPLV energy efficiencies and the lowest lifetime operating costs in their capacity ranges 60 TR through 2500 TR in water-cooled, 60 TR through 450 TR in air-cooled and 60 TR through 300 TR in evaporative-cooled.

VTS - Air Handling Units

VTS is a manufacture of Air Handling Units, Heating Units, and Air Curtains. VTS prides themselves on the shortest delivery time for the market (as little as three weeks), competitive pricing, and high manufacturing quality. VTS Ventus air handling units are universal, reliable, and energy saving devices.

Delta Therm Corp. - Heat Trace

Delta-Therm manufactures heat trace for the following applications: snow melting, roof de-icing, pipe Tracing, permafrost prevention and infrared heaters.

Pentair - Aurora Pumps

Pentair is the parent company of Aurora Pumps. The Pentair 3800 series is most commonly used in HVAC applications and is a direct replacement to the largest installed base.

Air Solution Company

Air Solution Company is a manufacturer of externally mounted Cottonwood Filter Screens (commonly called Air Inlet Filters, Intake Filters, Equipment Protection Screens and Bug Screens). They are specifically engineered for use on cooling towers, air cooled chillers and condensers, rooftop units, louver panels and other HVAC air intake systems.
